

ENVIRONMENTAL HEALTH JUSTICE IN THE ANTHROPOCENE:

USING A NOVEL GEOSPATIAL SCREENING TOOL
TO UNDERSTAND LAND-USE PRESSURES AND
PROMOTE PLANETARY HEALTH

DR. CHRIS G. BUSE, PHD

Centre for Environmental Assessment Research
University of British Columbia

**OCTOBER 27, 2021
10:00 - 11:00 AM**

**PRESENTED BY:
BRITISH COLUMBIA
COALITION INSTITUTE**

Chris is a member of a national research team called the Environment, Community, Health Observatory (ECHO) Network that explores and implements intersectoral tools and processes to redress the cumulative impacts of resource development. More specifically, Chris and his colleagues have piloted a geospatial, equity-informed, environmental health screening tool that measures environmental exposures, environmental effects, socioeconomic conditions and sensitive populations. The tool also quantifies cumulative environmental, community and health effects in an effort to better support better land-use decision-making.
